Wholesale Solar's Plug-n-Play 600 Backup Power Center. Compact, powerful and reliable.

When the lights go out will you be ready? This compact backup Power Center can keep your computer, lights or radio running until power is restored. Plug it into an outlet to keep batteries charged. When the grid goes down the solar panel will keep them charged. Keep your critical loads plugged into the power center; if utility fails, batteries and solar panel will supply the power you need.

Federal tax credit drops your cost to less than \$1,600!!

Expand your system with up to 2 batteries and/or add another
