The Plug-n-Play 3600-120GT. Gridtie solar with battery backup. Turn your meter backwards and keep the lights on when the grid goes down.

This powerful and compact system includes everything you need to harvest the sunshine every day and have power stored for emergencies. With a typical gridtied system if the grid blacks out so does your system... not with this battery based gridtie system. It includes a powerful 3,600 watt Outback Power sinewave inverter, an Outback Power FM60 MPPT charge controller, batteries, 540 watts of solar panels and it is all pre-wired, tested and ready to plug n play.

You can add up to 16 more solar panels to increase your power production.

These are the pieces of equipment that make up this quality system
